Women’s Edge – February 2008 Issue

Connie Domino has been conducting workshops on the *Law of Attraction*, both locally and nationally since September of 2001. The results have been amazing. Workshop participants experienced: more money, new romantic relationships, new jobs, job promotions, a boost in sales, better family relationships, a new career direction, improved health, more peace, harmony and clarity – many after only one to two class sessions! One school volunteer even manifested a newly built building for a charter school for underprivileged children in only six months. Her workshops had become so popular and the participants were having such great results, she kept getting requests to place the workshop in book form. *The Law of Attraction* is that book.

Connie has written this book to share this amazing, fast technique for obtaining your life’s dreams and goals. It is for those who are serious about making their dreams, goals and desires manifest quickly. Within its pages is an easy five-step program that will teach you a simple formula that you can use again and again to make your grandest dreams come true – fast!

So how does the *Law of Attraction* affect you personally?

The *Law of Attraction* teaches us that:

- All that we experience in our lives, we have attracted (both the good and the bad) by our thoughts, feelings, prayers, actions, inactions, and soul level decisions.
- We can change our circumstances by changing the way we think (and feel), what we believe, what we say to ourselves (self-talk) and the actions we take.
- The energy needed to make our dreams come true is already provided, already available in existence, and is waiting for our thoughts and beliefs to manifest it into the material world.
- Love is the energy; belief is the vehicle for manifestation. There is nothing in existence stronger than love and belief.

Connie says we can literally create our reality, create the life we want and manifest our desires, goals and dreams by using the *Law of Attraction*.

Sometimes our thinking, feelings and strategies only need fine tuning for our grandest goals and dreams to come true. Connie teaches a special technique for “how” to word

our goals and identify our blocks and barriers. She'll show us how to fine-tune our thinking, feelings and self-talk for very quick results.

Women's Edge recently had an opportunity to speak with Connie Domino.

W.E.: *So much of this book is centered on self-talk. Why is this important?*

Connie: Self-talk is so important because it can create our reality by the things we say to ourselves. As Henry Ford said, "Whether you believe you can or believe you can't, you're right." Positive self-talk can actually manifest positive desires into our lives, while negative self-talk can create energy blocks that can actually block a manifestation from coming true. It's vital to understand what you are already saying to yourself, both positive and negative. It's also important to understand what was said to you in your childhood about yourself, both positive and negative – because so much of our self-talk comes from what we heard as a child.

W.E.: *You use a lot of spiritual and biblical references in your book. Do you have to be religious for the Law of Attraction to work?*

Connie: I was raised in the Christian tradition, so I'm most familiar with the teachings of Jesus and will use some of his examples. However, all major religions include examples and I encourage readers to choose an example from the faith tradition and teaching they're most familiar and comfortable with. The *Law of Attraction* works equally well for those with no particular faith tradition. The main thing is, don't get caught up in the "semantics," or you will miss one of the most exciting opportunities for personal growth I have ever discovered.

W.E.: *What would you like to share with our readers?*

Connie: Show up and be present. Work on the five steps and the four exercises. If you do, the *Law of Attraction* can work for you too. Like Dorothy in OZ, you suddenly realize you had the key all along, but if someone had told you then, you wouldn't have believed it.
